WORK EXPERIENCE

Decathlon • Amsterdam (Netherlands)
08.2024 – Present

At Decathlon, we believe that sport has a vital role to play in helping societies to be healthier and happier. Some of the projects I've worked on:

Lower funnel team

Senior software engineer

- Develop and maintain user-facing features to enhance the checkout process and overall purchase experience.
- Collaborate with UX/UI designers to implement engaging and responsive web interfaces.
- Optimize web pages for maximum speed and scalability, focusing on the lower funnel stages.
- Debug and resolve technical issues to ensure a seamless shopping experience for users.

React • Svelte • Typescript • Datadog • Github • Scrum • English

08.2024 – Present

Gofore • Malaga (Spain)
01.2019 – 08.2024

Gofore is a technology, business, and design company that offers expert knowledge in digitalisation. It aims to shape the future the right way with its projects, partnerships, and values that prioritise ethics, sustainability, and impact. Some of the projects I've worked on:

Mobile application for a Client in the Mobility sector

Lead developer

- Developed an iOS and Android application using React Native, enabling customers to park, charge their cars, and access other mobility solutions.
- Served as the Lead Developer while also acting as the backup for the release manager, ensuring project deployment and coordination.
- Utilized GraphQL and the Apollo GraphQL library to transform and transfer data efficiently between the client and microservices.
- Designed and implemented an architecture to customize the UI for third-party providers, such as Azure and payment system providers.
- Collaborated closely with customer support teams to promptly address and resolve technical issues.

React Native • ReactJS • Typescript • Storybook • GraphQL • Parcel • Jest • Datadog • Firebase • Playwright • Fastlane • Gitlab • Scrum • English

10.2021 – 08.2024

Web & Mobile application for a Client in the Prevention of Hazards sector

Fullstack developer

- Spearheaded the development of a hazard prevention platform, focusing on creating a CMS that enabled managers to efficiently build documentation related to fire prevention
- Implemented features allowing for the integration of interactive floor plans and safety guidelines within the platform.
- Stepped in as the primary support for the project's culmination phase, conducting essential maintenance tasks on both the iOS and Android applications developed with React Native.

ReactJS • Typescript • HTML • Scss • React Native • Firebase • NodeJS • Github • Scrum • Trello • English

02.2021 – 09.2021

Web application for a Client in the University sector

Frontend developer

- Led the development of a hate speech detection dashboard designed to gather and analyze data from various social media platforms, including Twitter, Reddit, and others.
- Designed intuitive graphical representations within the dashboard to visually depict trends, patterns, and reports related to hate speech occurrences.

Angular • Typescript • HTML • Scss • Bootstrap • D3 • Gitlab • Scrum • Jira • English

10.2020 – 01.2021

Web application for a Client in the IoT sector

Frontend developer

- Worked for a leading measurement equipment manufacturer that offered a cloud-based measurement data monitoring system, enabling customers to remotely monitor measurement and alarm information at various sites.
- Managed the migration from AngularJS to Angular and developed new features.

AngularJS • Angular • Typescript • HTML • Scss • Bootstrap • Responsive Design • Maps API • i18n • Karma • RESTful API • Webpack • Gitlab • Scrum • Jira • English

09.2019 – 10.2020

Accenture • Madrid (Spain)
06.2015 – 12.2018

Accenture is a global professional services company that provides a broad range of services and solutions in strategy, consulting, digital, technology, and operations. It aims to deliver innovation to improve the way the world works and lives. Some of the projects I've worked on:

Web application for a Client in the Insurance sector

Frontend developer

- Lead the digital transformation of one of the largest insurance groups of Austria, Central and Eastern Europe.
- Spearheaded the software product definition, requirements, analysis and implementation.

AngularJS • EC6 • HTML • Scss • Bootstrap • Responsive Design • Handlebars • RESTful API • Scrum • Jira • Github • English

02.2018 – 12.2018

Web application for a Client in the Bank sector

Frontend developer

- Creation of a credit card portal.
- Analyze customer requirements.
- Tasks estimations and frontend development.

AngularJS • HTML • Scss • Bootstrap • Responsive Design • RESTful API • Scrum • Jira • Github • English

05.2016 – 04.2017

SIDE PROJECTS

During my spare moments, I find joy in coding. Here are some examples of my side projects:

Web for Personal Portfolio

01.2023 – Present

https://www.elenaorfe.com

Created a portfolio website using Next.js with Tailwind CSS, integrated an OpenAI-powered chatbot for natural conversations, and deployed the project on Vercel.

Next.js • Typescript • Tailwind CSS • Vercel • WCAG • OpenAI API

Web for an architecture and interior design studio

07.2021 – 01.2022

https://www.doscestudio.com

Developed a website with a headless WordPress CMS, integrated with Next.js with Tailwind CSS, and deployment on Vercel.

Next.js • Typescript • Tailwind CSS • GraphQL • Wordpress • Web hosting • WCAG
